

The New Web-Based Database by and for the Study Abroad Field

Licensing /Hosting Fees

In keeping with risk management best-practices, every international programs office needs a cost-effective, reliable, easy-to-use database to track important student, partner, and program data. Online student applications, financial aid and billing functionality, emergency contact information, a searchable program database, email-blast and bulk-mailing capability, GopherU has all of this, and more.

The International Partnership for Service-Learning and Leadership (IPSL) launched in January 2010 a web-based data management system designed for and by study abroad people. Our study abroad database is called "GopherU" and is a Social Enterprise developed in collaboration with Portland State University and The International Partnership for Service Learning (IPSL).

Non-profit-based Social Enterprise means that surplus funds generated from the licensing of GopherU stay in the study abroad community in the form of scholarship opportunities for students...including, potentially, **your** students!

Your office can license GopherU with one, simple annual fee. This fee is a sliding scale and based on your participant numbers. And for those schools sending fewer than 25 students abroad per year there is no annual hosting fee! *

Tier	Students/Year	Total Annual Fee
1	0 - 25	\$0
2	26 - 150	\$4,950
3	151 - 400	\$7,950
4	401 - 599	\$14,950
5	600 - 800	\$22,450
6	801 - 1000	\$29,950
7	1001 - 1250	\$37,450

As an additional incentive, early adopters (by June 30, 2010) of GopherU will have priority to IPSL study abroad program scholarship funds (valid for any IPSL program regardless of length) until June 2013.

For more information, please contact us at: sales@gopherapp.com

* No contract required. If you are not satisfied after one year, your office can simply cancel your annual license. Free service includes automatic software updates but does not include email support or initial data integration.
